Technical Data Sheet Chemicals

REPSOL RESISTEX® 1810F

REPSOL RESISTEX[®] 1810F is a metallocene ethylene-hexene copolymer. This material offers easy processability into thin films with excellent mechanical and optical properties. Good sealing characteristics. It contains processing aid and thermal stabilizers.

Applications

- Heavy duty packaging .
- Seal layer in co-extrusions •
- Excellent gloss and clarity .
- Industrial film: Stretch Hood, Stretch Film and Shrink Film .
- Agriculture applications: silage, mulching film and greenhouses .

Recommended melt temperature range from 180 to 230°C. Processing conditions should be optimised for each production line.

Storage

REPSOL RESISTEX[®] 1810F should be stored in a dry atmosphere, on a paved, drained and not flooded area, at temperatures under 50°C and protected from UV radiation. Storage under inappropriate conditions could initiate degradation processes which may have a negative influence on the processability and the properties of the transformed product.
